PROFILE SUMMARY

Graduated engineering student currently working as a Developer in the AI Team at Avaada Electro, with strong skills in Python, Flask, FastAPI, React, API integration and Linux. Experienced in developing web applications and automating processes to improve efficiency.

SKILLS

Python, Data Science, AI, ML & DL, AI Agents, RAG, GenAI, SMTP Servers, HTML, CSS, Java, Gradio & Streamlit UI, FaskAPI, Flask, Django, React, Ubuntu (Linux), MobaXterm, Server Deployment AWS, EmbeddingGemma Model Creation, MCPs.

Database : SQL(MongoDB, MySQL and Dbeaver), Vector Dbs(Chroma, Faiss, Qdrant), Cloud DBs (Supabase, Pinecone)

Automation Tools : N8N, Retool, CrewAI, Workflow44

Understanding Skills : svelte frameworks

EDUCATION

B.Tech	Percentage: 70
JNTU-K University (Tirumala Institute of Technology & Sciences)	Jan 2021 – Apr 2025
• Course: CSE(<i>Artificial Intelligence</i>)	
Intermediate	Percentage: 73
Vasavi Junior College	Jan 2019 - Jan 2021
• Course: MPC	
SSC	CGPA: 8
Andhra High School	Mar 2019

WORK EXPERIENCE

Consultant – SAP and AI & ML

Avaada Electro, Noida, Uttar Pradesh

- Worked as Consultant in AI& ML along with SAP.
- Currently working as part of the AI Team as a AI Full-Stack Developer

INTERNSHIPS

- Successfully completed the internship program and got a certification on Python Development from OctaNet Services Pvt Ltd.
- Successfully completed the internship program and got a certification on Data Science from Oasis Infobyte.

PROJECTS

HR Assistant

- Built an HR Assistant application as a solo project using n8n for workflow automation, **ChromaDB** for vector storage and Chunking with OpenAI Models, React frontend, and Python backend.

Solar Expert

- Developed a Solar Expert application with **Zoho CRM** integration via SMTP, React frontend, Python backend, OpenAPI and Gmail Message to user and Org.

AvaadaWebUI :

- Created as per Avaada's requirements, developed similar to OpenWebUI for interactive web-based user interface.

Resume Analyzer

- Developed using Python with a frontend and login page integrated via Flask and FastAPI. Implemented OpenAI and machine learning techniques for intelligent processing.

Weather Alert

- Designed and implemented a weather alert application using Python, integrating interactive user interfaces developed with Gradio. Leveraged Tomorrow.io, Solcast, and Metromatics APIs to provide real-time weather data and alerts. Collaborated on developing user-friendly features.

Tender Scraper

- Developed a tender scraping system for 4 websites using Python with Flask and FastAPI for the frontend. Used OpenAI to generate structured synopsis documents (DOCX) with key parameters, and applied multiple fallback methods for scraping using BeautifulSoup, Selenium, and Machine Learning Techniques.

Currency Converter

- Developed a currency conversion using Python with a Gradio-based user interface. Integrated real-time exchange rate data every 60min through the exchangerate.host and currencyfreaks.com APIs for accurate currency conversions.

Academic Project

- Imagination Made Real – Stable Diffusion for High-Fidelity Text-to-Image Tasks | Implemented text-to-image generation using Stable Diffusion with Gradio UI and NVIDIA GPU acceleration. Published in IJIRT (<https://ijirt.org/article?manuscript=175379>).

CERTIFICATIONS

- OctaNet Services Pvt Ltd. Certificated (Python Development)
- HackerRank Skill Certificated Python(Basic)
- Oasis Infobyte Certificated (Data Science)
- Motive Education Certificated Office Automation(MS-Office)
